

## Physics Lab

Physics laboratory aids a student in establishing the relevance of the theory. It brings clarity in the mind of the students regarding the basic concept of the relevant topic and subject. Students understand the difference between theory and application.

It is equipped with latest apparatus related to semiconductor physics, optoelectronics physics, Electromagnetics and Mechanics of Solids. Experiments carried out in Physics Laboratories helps students in advanced learning of the relevant subjects.

## Chemistry Lab

Chemistry Lab is fully equipped to ensure that students are in touch with all the latest developments and techniques . The environment and setting of the lab nurtures the intuitive and inquisitive minds of the students and enhance their zest to make scientific inquires.

It is equipped with latest apparatus related to Various Titrations, Acid value of oil, TLC, Conc. of Hard ions present in sample of water, Viscosity, Surface Tension, Preparation of Polymer etc. experiments carried out in Chemistry Laboratory that helps students in advanced learning of the subject.

**Khalsa College of Engineering & Technology, Ranjit Avenue, C-Block, Amritsar-143001, 0183-5030765**

## **Communicative English Lab**

Communicative English Lab has been designed and developed to address the listening, speaking, reading, writing, phonetics & soft skills by incorporating the best in students. This laboratory supports the overall and personality development of the students.
