IT/CORE SECTOR JOBS

Job Role : Software Development Engineer in Test

Job ID : 1010942HV

Qualification : BE, BTech, ME, MTech

Segment : IT

Business Unit : Hitachi Vantara

Profession (Job Category) : Engineering & Science

Location : Pune India

The Role :

We are seeking a Software Development Engineer in Test to join a fast-paced, highly collaborative engineering team. In this role, you will work with your scrum team to prototype, design, develop, and qualify software solutions. The Engineering team embraces a highly collaborative development model that requires deep development and test involvement from start to finish for each project.

Responsibilities :

- Contribute to the designing, development, qualification, and support of scalable software applications/systems
- Collaborate and work with scrum team members to turn requirements into prototypes, functional specifications, technical designs, and implementation
- Contribute to defining, implementing, and testing of user stories
- Help drive technical direction for the testing of a complex software system
- Advocate for the quality of the product through leading in this competency on your scrum team
- Participate in creating, running and maintaining White Box and Black Box test suites to ensure regression coverage and software quality with a focus on automation
- Collaborate with developers across scrum teams to maintain technical design and code standards especially test code
- Triage and document test failures, validate veracity of fixes and ensure new regression coverage as necessary
- Participate in reviews of business requirements

Khalsa College of Engineering & Technology
Ranjit Avenue, C-Block, Amritsar-143001
0183-5030765

Experience and Skills :

- 0-2+ years of hands-on contribution in software engineering or related field
- Knowledge of Object Oriented development and design principles
- Experience testing scalable distributed software with an understanding of concepts like consensus, CAP, event driven architectures, RabbitMQ as well as asynchronous processing
- Good understanding of and experience testing applications deployed on Kubernetes, OpenShift, Rancher or other similar platforms for automating deployment, scaling, and management of containerized applications
- Database knowledge (e.g. NoSQL Key-Value storage, ACID concepts, distributed transactions)
- Understanding of networking (e.g. HTTP1.1/2, Remote RPC, TCP/IP, load balancing, firewall)
- Familiar with Linux OS (RH based) administration and testing of customized installation
- Understanding of engineering processes (including Agile methodologies)
- Good problem solving skills
- Ability to convey complex technical information in a clear and concise manner
- Tech savvy, detail oriented, and highly driven
- Outstanding interpersonal and communication skills
- A passion for ensuring software quality
- Relevant formal education, including BSCS or MSCS

Cisco Freshers Recruitment Details :

Job Role : TAC Engineer (Contract Positions)

Qualification : BE, BTech, ME, MTech, MCA

Year of Passing : 2020, 2021 Pass outs

Salary : Rs. 6,50,000/- per annum

Khalsa College of Engineering & Technology
Ranjit Avenue, C-Block, Amritsar-143001
0183-5030765

Job Category : IT | Software

Experience : Freshers

Job Location : Bangalore

Job Description :

- We are looking to employ people like you as technical support engineers. All positions begin on a contract basis.
- Our TAC engineers are called upon by our customers around the world when they are facing critical network outages and when they need help to troubleshoot and resolve complex technical challenges. Most of the time, issues are escalated to TAC only when other teams – including those of leading IT services companies – have failed to resolve them.
- Needless to say, there is never a dull moment in the life of a TAC engineer! As a TAC engineer, you are learning constantly, growing by the day, and applying your knowledge to resolve complicated, challenging, and difficult technical issues. The majority of TAC engineers are certified as CCIEs. All are great mentors and colleagues. As a TAC engineer, you work on all networking technologies, including routing and switching, security, data center, content, optical, and wireless.
- Take advantage of this phenomenal opportunity to roll up your sleeves and become intimate with a broad range of networking technologies while resolving very tough and complex issues.
- Find out if you have the talent and skills to be a part of this elite team.

Eligibility Criteria :

- BE/BTech/MCA/ME/MTech from any learning institution (2020 – 2021 batch).
- College GPA – no restrictions.
- Great pH score.
- Excellent oral and written communication skills.
- Ability to work hard to deliver results.

What TAC can do for you :

- We invest heavily in your training, a rigorous 45 days training program.
- Plus, you earn your regular salary during the training process.
- As part of your training, you rotate through several technology teams and get first-hand experience working with other TAC engineers.
- The training is very focused and your performance is reviewed on a weekly basis.

Good to have the below technical Knowledge :

- Good understanding on Networking Basics.
- Awareness and basic understanding of one of the following – Knowledge on Routing and Switching; Basics of Cisco Security Technologies like Firewall, VPN, AAA and Firepower; Understanding on Voice, IP telephony or any collaboration products; Data Centre.

Khalsa College of Engineering & Technology
Ranjit Avenue, C-Block, Amritsar-143001
0183-5030765

- CCNA – Good to have
- Basic knowledge of Linux, SQL and/or Oracle Database and Microsoft Active Directory.
- Strong analytical and problem-solving skills with ability to troubleshoot technical problems.
- Ability to Assertively communicate and demonstrate attitude to resolve/approach problems.
- Ability to multi-task, self-start, work in a fast-paced team environment and work independently.

BYJUS Off Campus Drive 2022 Details :

Job Role : Business Development Associate

Qualification : Any Degree/MBA

Batch : 2020/2021/2022 Batch

Job Location : Bengaluru

Salary : Rs 4.5 LPA

Last Date To Apply : ASAP

Job Description For BYJUS Jobs 2022 :

Khalsa College of Engineering & Technology
Ranjit Avenue, C-Block, Amritsar-143001
0183-5030765

This is an individual contributor role in an employee-oriented, high performance environment that emphasizes on spreading the BYJU's unique way of learning in your city. Your role will start with contacting potential customers (parents and students) to set up meetings, counsel the students on the BYJU's unique way of learning and convert them into premium subscribers in your designated zones. Must have requirements:

- Should be a graduate (any graduate is okay).
- Should be passionate about sales.

Bonus and other benefits :

- You can earn upto 3 Lakh in your incentives.
- 300 best performers for each quarter (every 3 months) are taken on a 5 days fully paid international trip.
- You will have weekly targets to achieve, consistent failure to achieve them will obviously result in job cancellation, that's not a surprise. Go big or go Home! (to be honest it's easy)
- This is a high-performance job for someone who wants to make it large, take big risks and continuously challenge themselves.
- We require high intent, extreme determination and hard work which will be most certainly rewarded.
- We are somewhat still a start-up, so you will have more opportunities to be recognized than elsewhere (if you are honest to your work).

Skills Required For BYJUS Jobs 2022 :

- Effective Communication and quick witness.
- Should be highly energetic and enthusiastic.
- Must have keen interest in education and mentoring students.
- Prior experience in sales and business development is an add on.
- Good interpersonal and presentation skills.

Selection Process For BYJUS Jobs 2022 :

- Aptitude Written Test Online
- Group Discussion
- Technical Interview
- HR Interview
