=====  
Denodo Technologies

Data Engineer

Chennai, Tamil Nadu, India

Full-time

Company Description

Denodo is the leader in data virtualization – providing unmatched performance, unified access to the broadest range of enterprise, Big Data, cloud and unstructured sources, and the agilest data services provisioning and governance – at less than half the cost of traditional data integration. Denodo’s customers have gained significant business agility and ROI by creating a unified virtual data layer that serves strategic enterprise-wide information needs for agile BI, big data analytics, web and cloud integration, single-view applications, and SOA data services across every major industry. Founded in 1999, Denodo is privately held.

Job Description

The Opportunity

Denodo is always looking for technical, passionate people to join our Services Engineering team. We want a professional who will consult, develop, train and troubleshoot to enhance our clients’ journey around Data Virtualization.

Your mission: to help customers achieve and maintain success through accelerated adoption and productive use of Denodo solutions.

In this role, you will successfully employ a combination of high technical expertise and client management skills to conduct troubleshooting and issue resolution, provide technical guidance and advice through remote or on-site consulting engagements, deliver timely and complete solutions to customer issues, and being a critical point of contact for getting things done among Denodo, partner and client teams. Our client’s rely on data in their daily operations. You will be called upon to creatively assist our customers in ensuring they are successful in their data processing endeavors utilizing our products.

Duties & Responsibilities

As a Data Services Engineer you will successfully employ a combination of high technical expertise, research and investigative know-how, troubleshooting and problem-solving techniques, and communication skills between clients and internal Denodo teams to achieve your mission.

Obtain and maintain strong knowledge of the Denodo Platform, be able to deliver a superb technical discussion, including an overview of our key and advanced features and benefits, services offerings, differentiation, and competitive positioning.

Constantly learn new things and maintain an overview of modern technologies.

Provide technical consulting, training and support.

Khalsa College of Engineering & Technology  
Ranjit Avenue, C-Block, Amritsar-143001  
0183-5030765

Diagnose and resolve client's inquiries related to operating Denodo software products in their environment.

Participate in problem escalation and call prevention activities to help clients and other technical specialists increase their efficiency when using Denodo products.

Be able to address a majority of technical questions concerning customization, integration, enterprise architecture and general feature/functionality of our product.

Provide timely, prioritized and complete customer-based feedback to Product Management, Sales, Support and/or Development regarding client's business cases, requirements and issues.

Train and engage clients in the product architecture, configuration, and use of the Denodo Platform.

Promote knowledge and best practices while managing deliverables and timelines.

Capable of building and/or leading the development of custom deployments based on and even beyond client's requirements.

Manage client expectations, establish credibility at all levels within the client and build problem-solving partnerships with the client, partners and colleagues.

·Develop white papers, presentations, training materials or documentation on related topics and contribute to knowledge management activities.

Participate in on-call support of Denodo products.

Be willing to travel as necessary to address or service customer needs.

Qualifications

Required Skills

BS or higher degree in Computer Science.

Solid understanding of SQL and good grasp of relational and analytical database management theory and practice.

Good knowledge of JDBC, XML and Web Services APIs.

Excellent verbal and written communication skills to be able to interact with technical and business counterparts.

Active listener.

Strong analytical and problem solving abilities.

Lots of curiosity. You never stop learning new things.

Creativity. We love to be surprised with innovative solutions.

Willingness to travel on occasion.

Be a team worker with positive attitude.

We Value

Experience working with GIT or other version control systems.

Experience working with Big Data and/or noSQL environments like Hadoop, mongoDB, others.

Knowledge and experience with systems and services hosted in the main cloud vendors (AWS, Azure, GCP).

Experience working with caching approaches and technologies such as JCS.

Experience in Windows & Linux (and UNIX) operating systems in server environments.

Business software implementation and integration projects (e.g. ETL/Data Warehouse architectures, CEP, BPM).

Khalsa College of Engineering & Technology  
Ranjit Avenue, C-Block, Amritsar-143001  
0183-5030765

Integration with packaged applications (e.g. relational databases, SAP, Siebel, Oracle Financials, Business Intelligence tools, ...).

Industry experience in supporting mission critical software components.

Experience in attending customer meetings and writing technical documentation.

Experience in Java software development, especially in the web and database fields.

Foreign language skills are a plus.

Additional Information

Employment Practices

Denodo is an equal opportunity employer and prohibits discrimination and harassment of any kind. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity or expression, pregnancy, age, national origin, disability status, genetic information, protected veteran status, or any other characteristic protected by applicable law. Denodo will provide reasonable accommodation to employees who have protected disabilities in accordance with applicable law.

=====  
Eligibility Criteria for Blackboard Recruitment 2021:

BE/ B.Tech – Computer Science/ IT

Job Description:

We're looking for an Associate Software Engineer (iOS) to help us push the boundaries of what education can offer through the power of technology. Education is our passion, and our team members bring that to work each day as they aim to advance learning in every region of the world. Blackboard is the world's leading education technology company, providing dynamic products and services to the global education community. We're focused on driving innovation in EdTech and working with our clients to create a smarter learning environment.

As Associate Software Engineer (iOS), you will have primary accountability for the design, development, and support of iOS Mobile applications. Your primary responsibility will be to design, develop, and write unit test cases for the iOS Mobile applications, and to coordinate with the rest of the team working on different layers of the infrastructure. Thus, a commitment to collaborative problem solving, sophisticated design, and product quality is essential.
